Re:	Readout Meter RO-2 Rental	From:	Jake Avorio

Based on our conversation, we'd like to present the following quotation for flowmeter rental:

This quotation is for Readout Meter setup on one application at the location and for recording data from it. Typically, we record data in 10-second intervals for a 1-week period. This duration is limited by the amount of available storage in the data file. If we set the meter to record over a longer period, the readings will need to be spaced farther apart. Generally, a single week is sufficient to capture normal operation. We recommend that the meter be used during regular or peak building usage, not over holidays or periods of low occupancy.

The total rental cost for one week is $750, broken down as follows:

5-day meter fee – $150/day = $750 (weekends excluded)

If our technician is unable to pick up the meter on the scheduled date, we will not charge for any additional time.

If the Readout Meter is left at the jobsite to record, a Damage Deposit of $6,000.00 is required. Upon return of the rental meter, credit will be issued against the deposit, less the labor charge, rental charge, and any damage/repair costs for the meter.

Please note that access to a 115V power supply will be required to power the meter.

If any insulation must be removed, we can do so and will tape it back in place to the best of our ability, but we cannot guarantee a seamless reinstallation.

TERMS: **Net 30 days**

Prices will remain in effect for 30 days and are subject to taxes where applicable.

Again, thank you for this opportunity. If you have any questions or if you would like to place an order, please call us at **(773)774-2800**, or email me at **javorio@bornquist.com** or **service@bornquist.com**.
We look forward to hearing from you soon.

Best regards,

BORNQUIST, INC.
